ABOUT ME

I specialize in developing scalable web and mobile applications, with a strong focus on the JavaScript ecosystem. Throughout my career, I have worked on both the front end and the back end, always prioritizing the creation of intuitive interfaces and efficient code.

SKILLS

- Frontend: React.js, Next.js, shadcn/ui, Svelte, TypeScript, Redux.js, Tailwind, Zod.
- APIs & Data: GraphQL, RESTful APIs, React Query/Apollo, Zod.
- Backend: Node.js, Docker, Express.js.
- Mobile: React Native (iOS/Android)
- Databases: PostgreSQL/MySQL..
- Tools: CI/CD, Git, Agile methodologies, SonarQube, Playwright, Model Context Protocol (MCP), AI-Assisted Development.
- Among others.

EDUCATION

2014 2019 **Systems Engineering**
Universidad Nacional Experimental Politécnica de las Fuerzas Armadas.

Professional Experience

2019 2020

JAK IDEAS & SOLUTIONS

- Responsible for the design and deployment of web and mobile systems. Expert in the PHP ecosystem (Laravel and CodeIgniter) for back-end development and APIs. Development of hybrid mobile applications using Ionic to improve user accessibility.

2020 2021

MARKETING FINO, C.A

- Full-Stack Development: Design, implementation, and maintenance of comprehensive web platforms, ensuring a seamless user experience and robust server-side logic.
- Mobile Engineering (React Native): Development and deployment of cross-platform mobile applications (iOS/Android) using React Native, optimizing performance and the user interface to maximize user engagement.
- Web Architecture: Implementation of scalable web solutions focused on integrating dynamic features that support the company's digital strategy.

2021 2022

AUTANA'S INNOVATION

- I worked as a full-stack developer, where I led the design and development of robust and secure e-commerce platforms using Laravel. I also added value to the business by implementing advanced WordPress websites, notably through the development of custom plugins that expanded the CMS's functional capabilities, successfully integrating tailored technical solutions with the organization's strategic marketing needs.

Professional Experience

PRETTY TECHNICAL

- As a Software Developer, I specialize in developing and optimizing high-traffic products for the iGaming and online casino industry, working on both internal PAAS solutions (such as Mikado and Petes Casino) and bespoke platforms for international clients. My role involves building secure, performant, and well-tested features within a high-scale web environment, ensuring a seamless user experience for complex gaming interfaces. I collaborate closely with Product Managers, UX designers, and Backend Engineers to achieve common goals in a fast-paced, iterative environment. Beyond feature development, I advocate for code quality and maintainability through rigorous code reviews and best practices. I am proactive in resolving prioritized issues via Jira and contribute to a collaborative workflow that focuses on shipping continuous improvements and maintaining a high bar for engineering excellence.

In closing, I would like to highlight that I possess a strong foundation in data structures and algorithms, which underpins my approach to software development. I prioritize writing efficient and optimized code by employing appropriate data structures and algorithms, ensuring scalability and performance in my applications. Whether it is implementing sorting algorithms, optimizing search operations, or designing complex data models, I consistently strive to deliver elegant, efficient solutions that meet project requirements and exceed expectations.

I you'd reached here, Thanks for you time, I appreciated it
